4. Customers with characteristics of vulnerability

The Society categorises Vulnerabilities as shown below: -

Health – Health conditions or illnesses that affect ability to carry out day to day tasks;

Life Events – Life events such as bereavement, job loss or relationship breakdown;

Resilience – Low ability to withstand financial or emotional shocks;

Capability – Low knowledge of financial matters or low confidence in managing money (financial capability). Low capability in other relevant areas such as literacy, or digital skills.

The Product is designed for those customers who require a no ERC product, and for those with a smaller deposit and which is likely to include some customers with characteristics of vulnerability or who will experience vulnerability over time.

SVR mortgage customers may also include First Time Buyers, who by their nature would also be less likely to have a comprehensive understanding of the implications of the product, and also of entering into the financial commitment of a first mortgage.

SVR mortgage customers may also include borrowers who are retired, who by their nature may also be less likely to have a comprehensive understanding of the product and may have characteristics of vulnerability which could include health, resilience, and capability.

SVR mortgage customers may also include borrowers whose mortgage term will extend past their defined national retirement age, which may lead to characteristics of vulnerability which could include health, resilience, and capability.

We considered the needs, characteristics, and objectives of customers with characteristics of vulnerability at all stages of the design process for this Product to ensure the Product meets their needs.
